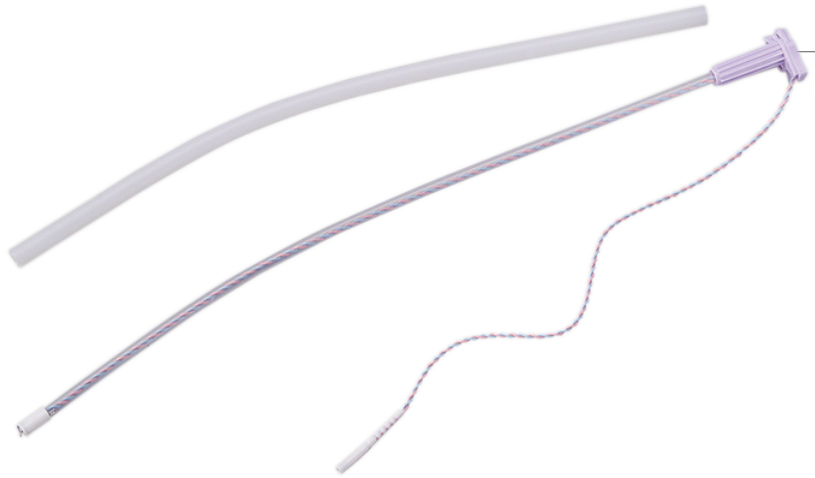
OB MONITORING AHA

LATEX FREE | STERILE | SINGLE-USE

Fetal spiral electrodes (FSE) are designed and tested for use with GE HealthCare® Corometrics™ monitors. When internal monitoring is required, fetal spiral electrodes help monitor the fetal heart rate (FHR) through electric transducers that connect directly to the fetal scalp. FHR monitoring provides the crucial basis for evaluating fetus wellness.



Wiring clasp at top of electrode, which allows for steady, one-handed placement and release

FSE AND ACESSORIES

ITEM	DESCRIPTION	PK
7000AAO	Fetal Spiral Electrodes	50
2464AAO-20	Leg Attachment Pad	50
1590AAO	Cable, FSE, Round Connector to the Monitor, 2.4 m	1
1591AAO	Cable, FSE, Rectangle Connector to the Monitor, 2.4 m	1

MATERNAL ECG CABLES AND LEADWIRES

ITEM	DESCRIPTION	PK
1442AAO	Y Adapter Cable for Maternal/Fetal ECG Rectangular Connector, 30 cm	1
1554AAO	Cable, Multi-Link™ 3-Lead Maternal ECG, AHA Round Connector, 2.4 cm	1
