Intended use
The disposable infant temperature probes are intended to be used in monitoring temperature. They are designed for use with GE Healthcare Graphic™, Panda™, Lullaby™ and Care Plus™ systems in neonatal intensive care unit. These devices are indicated for use by qualified medical personnel only.

Instructions for use

Ensure skin is clean and dry prior to application of probe.

To attach the disposable probe (single use only), place the probe on the baby's skin, peel the paper backing of the heat reflecting patch from the adhesive side and apply the patch on top of the probe with the reflective foil side up.

Plug the probe wire into the jack panel of the host device. Refer to the operator manual of the host device for detailed instructions on temperature measurement with the probe.

Dispose after use.

Any serious incident that has occurred in relation to the device should be reported to the manufacturer at productquality@myairlife.com and the competent authority of the Member State in which the user and/or patient is established.

Contraindications
The adhesive cover on this probe should never be applied to a skin surface that is severely irritated by abrasion, laceration, incision or burning. The use of the skin probe cover on irritated, chafed or inflamed skin is contraindicated.

Adverse reactions

While adverse reactions are rare, the following have been associated with the use of the skin temperature probe, during the use or immediately after the use:
Acute or chronic skin irritation or inflammation.

Warnings
• Before use check that the product and its package is intact and clean. Do not use product if you see any visual signs of damage. A damaged product should be discarded immediately. Never use to repair a damaged product, modify a product or use a product regularly by others.
• Using this device with any equipment other than those listed in Intended Use may result in inaccurate temperature measurements.
• Do not use heat reflecting patch to avoid the effect of ambient temperature on measurement. Unusual temperature readings should be checked.

• Do not use the device if you are unable to read the display. Reuse may cause a risk of cross-contamination, affect the measurement accuracy, system performance, or cause a malfunction as a result of the product being physically damaged due to damage or contamination by others.
• Do not pull on the probe cable when disconnecting the probe from host device.
• Do not remove the reflective foil from the reflective patch. Replace the patch when the reflective foil is damaged.

• To ensure appropriate and safe functioning of the probe, check the stability of the probe and the host device and probe contact with the host device continuously during use. Use heat reflecting patch to ensure appropriate contact of probe with skin.

• Check appropriate placement and position of the probe and probe cable initially and during use to prevent disconnection of probe and probe connector, entanglement, pressure, tipping, etc. to occur as they might cause erroneous temperature readings, airway obstruction, skin irritation, desiccation, scaling of other items or people, etc.

• MR unsafe. Do not use this product in MRI environment.

Technical information
Operating range: 30°C to 42°C
Accuracy: ±0.1°C device
Storage
Storage temperature: +10°C/+50°F to +35°C/+95°F
Measuring site: Infant skin, preferably abdominal area
Disposal
Dispose per local and state environmental regulations.

Technical description
For further description see the host device user guide or manual, or contact your local sales representative.
Not made with natural rubber latex.

AirLife™ Кожи температурни сонди за бебета, за един пациент

Инструкции за употреба

Продължение
Сондите сонди за едноразовна употреба за бебета са предназначени за измерване на кожата температура на бебета. Те са предназначени за употреба с системите Graphic™, Panda™, Lullaby™ и Care Plus™ от GE Healthcare в интензивно отделение за неонатални. Теми устроиства са предназначени за измерване на кожата температура на бебета в интензивно отделение за неонатални.

Инструкции за употреба

Уверете се, че кожата е чиста и сува преди прилагане на сондата. За да приложите сондата за едноразовна употреба (само за едно измерване), поставете сондата върху кожата на бебето, отлепете хартиеното покритие
