Please complete the evaluation form after using the product.

DATE _____

FACILITY / HOSPITAL _____

NAME + TITLE _____

DEPARTMENT _____

REF NUMBER _____ SAMPLE NUMBER _____

The ranking is based on a scale of 1 to 5: 1 = Strongly disagree with the statement. 5 = Strongly agree with the statement. If you disagree or strongly disagree with statement, please add comments at the bottom as to why you feel that way.

LEVEL OF AGREEMENT (CIRCLE ONE FOR EACH STATEMENT)	1 STRONGLY DISAGREE	2 DISAGREE	3 NEUTRAL	4 AGREE	5 STRONGLY AGREE	NOT APPLICABLE
The device was easy to attach, use and detach.	1	2	3	4	5	N/A
The wiper balloon on the device was able to efficiently and effectively remove secretions from the ETT.	1	2	3	4	5	N/A
The rinsing (irrigation) process was effective, efficient.	1	2	3	4	5	N/A
The device did not appear to increase patient discomfort compared to any other type of clearing/ suction devices.	1	2	3	4	5	N/A
The device performed reliably, is safe for clinical use and meets my clinical needs.	1	2	3	4	5	N/A
The ability to completely shut off the patient/ventilator circuit from the suction catheter makes catheter irrigation and cleaning safer.	1	2	3	4	5	N/A
The ability to replace the catheter as needed while leaving the manifold in place has value.	1	2	3	4	5	N/A
Clearing the ETT with the Liberator device made a positive clinical difference compared to suction alone.	1	2	3	4	5	N/A
The ability to use other instruments, such as bronchoscopes, through an adapter that can be connected without opening the patient/ventilator circuit, has value.	1	2	3	4	5	N/A
I recommend that my hospital use the Ballard Liberator ET Tube Clearing System.	1	2	3	4	5	N/A
