

## INSERTION GUIDE

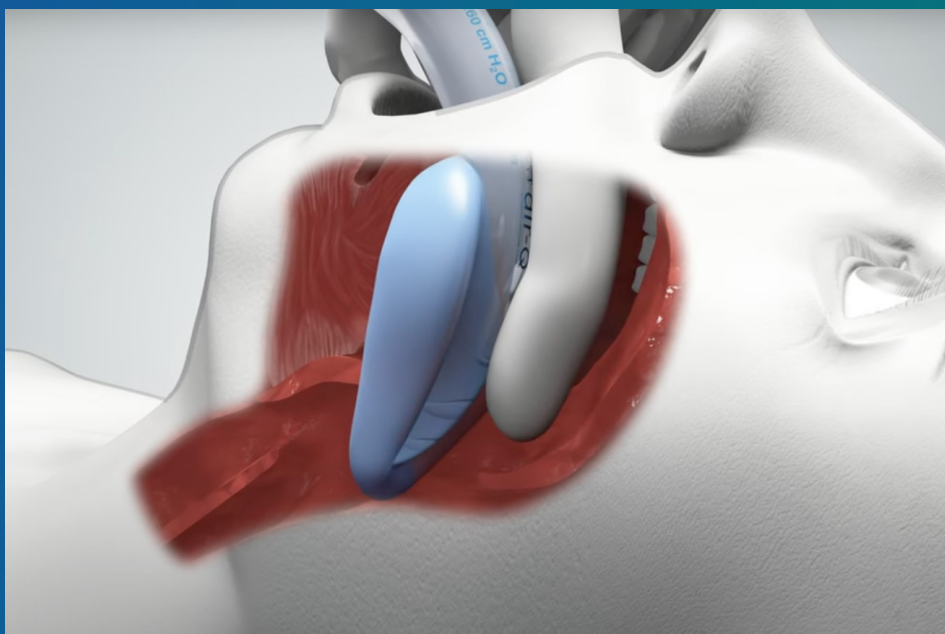

### Step 1

Lubricate the external surface including the mask cavity ridges.

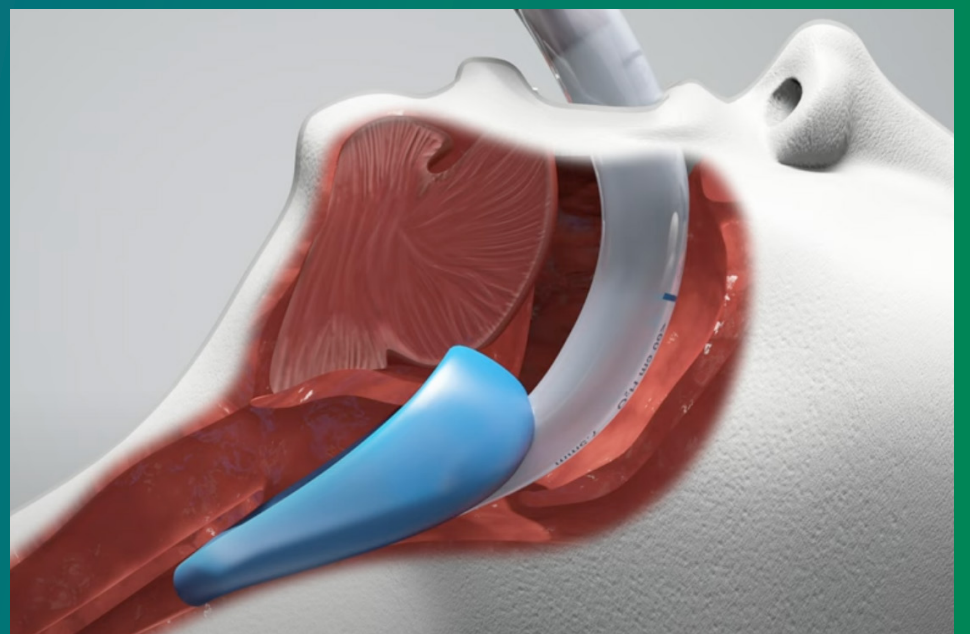

### Step 2

Place the front portion of the Air-Q<sup>®</sup>3 mask between the base of the tongue and the soft palate at a slight forward angle.

### Step 3

Place back of back of left index finger behind the mask, flexing the finger forward to help guide the mask around the corner into the pharynx.

### Step 4

Continue to advance until fixed resistance to forward movement is felt. Correct placement is determined by this resistance to further advancement.
