

# MRI TRANSPORT CIRCUIT

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE

A complete, lightweight, ready-to-use, non-metallic, non-electrically conductive MRI transport circuit. Compatible with AirFlow™ Manual Resuscitators and with some portable transport ventilators that have a passive exhalation valve.

**9317 MRI Transport Circuit**  
with Patient Valve, PEEP, B/V Filter

## MRI TRANSPORT CIRCUITS

- Lightweight, decreases pull on ET tube
- Minimal deadspace non-rebreathing valve with a swivel patient connector
- Adjustable PEEP valve and a proximal monitoring port that can be used for airway pressure
- Pre-assembled for simplicity in setup and use
- Available with Adult CO<sub>2</sub> Easy™ Carbon Dioxide Detector
- Bacterial/Viral filter included

## MRI DISPOSABLE TRANSPORT CIRCUIT

ITEM	DESCRIPTION	PK
9317	96" (2.4 meters) Circuit with Patient Valve, PEEP, B/V Filter	10
9318	96" (2.4 meters) Circuit with Patient Valve, PEEP, B/V Filter, CO <sub>2</sub> Easy	10

**CO<sub>2</sub> Easy™**  
Carbon Dioxide  
Detector

With a large two inch visual indicator, anti-fog coated lens, and mounted up front, the CO<sub>2</sub> Easy makes it easy to view critical carbon dioxide levels without looking away from the patient.
