

# COMFORT SOFT PLUS® OXYGEN CANNULAS

LATEX FREE | SINGLE PATIENT USE | DISPOSABLE | DEHP FREE

The unique elastomeric properties of the over-the-ear Comfort Soft Plus® tubing minimizes friction and shear forces on the skin at all contact points and acts as a “strain relief” when a patient turns their head. As a result, Comfort Soft Plus cannulas are more comfortable, enhancing patient compliance and therapy outcomes.

BiFlo™ Nasal Mask

## COMFORT SOFT PLUS® OXYGEN CANNULAS

- A broad range of sizes from neonates to adults allows for system-wide standardization
- Soft tubing helps to reduce device related pressure ulcers
- Direct economic benefits associated with the reduction of wound care expenses
- Eliminates the need and expense of foam pads and wraps
- BiFlo™ Nasal Mask , a unique alternative for patients with nasal necrosis
