

# NASAL AIRFLOW PRESSURE AND SNORE TRANSDUCER

## BINAPS®

BiNAPS® is a diagnostic pressure transducer device for use during sleep disorder studies. It will receive airflow/snore pressure signals via Salter Labs® Sleep Diagnostic Oral-Nasal Cannulas, process through a special piezo type pressure transducer and deliver an accurate signal to your polysomnograph input box. The exclusive integral lead verification tester has a green light to indicate functional leads from the BiNAPS to your input box.

- Detect Airflow Pressure and Snore changes
- No battery required
- Compact and lightweight
- Integral circuit tester/indicator for lead verification
- Self adhering hook and loop mounting patch included

ITEM	DESCRIPTION	PK
5500	BiNAPS Nasal Airflow Pressure and Snore Transducer	1

## AIRFLOW LEAD ADAPTER

- For use with Alice® 5 PSG System
- Adapter allows conversion to 1.5mm DIN connector permitting usage of the BiNAPS® transducer

ITEM	DESCRIPTION	PK
5520-0-1	Airflow Lead Adapter	1

## ORAL-NASAL THERMAL AIRFLOW SENSING SYSTEM

ThermiSense® is a diagnostic thermistor temperature sensing system for use during sleep disorder studies. It delivers an accurate signal to the head box of your PSG recorder. The cannula/holder allows the ThermiSense thermistor to be placed in the optimal position to accurately sense the oral-nasal thermal airflow changes as well as the nasal pressure signal when used with the BiNAPS® unit or other nasal pressure sensing device. This combination meets the AASM guidelines for nasal pressure and oral-nasal thermal airflow sensing.

- Accurately detects events: Apnea/Hypopnea/Flow limitation
- The reusable thermistor mounts on disposable cannula holder to capture oral-nasal airflow signal, reducing potential of skin contact
- The system contains an integral circuit tester to check both the head box leads and thermistor for continuity
- Rugged, Kevlar® tensile cables for product durability
- Compatible with most major PSG systems

ITEM	SIZE	SENSOR	THERMISTOR WIRE	COMPONENTS	PK
5700	Standard Adult Kit*	-	-	5700B, 5700T, 5751, 5761,1001	1

# THERMISTOR CANNULAS

## THERMISENSE® CANNULA

Features a patented pocket/holder to secure ThermiSense® thermistor in place.

- Nasal only, pressure and snore monitoring
- Nasal only, pressure and EtCO<sub>2</sub> gas sampling
- Oral-Nasal, pressure and snore monitoring
- Oral-Nasal, pressure and EtCO<sub>2</sub> gas sampling

## ORAL-NASAL

## PNEUMOTHERM™

PneumoTHERM™ is a single channel diagnostic thermocouple used during sleep disorder studies to accurately sense oral-nasal thermal airflow changes. The reusable thermocouple tips are insulated to eliminate contact noise artifacts, and delivers a reliable signal to the headbox of virtually all PSG recorders currently available.

- The reusable PneumoTHERM is compatible with standard Salter Labs® diagnostic cannulas. Kevlar® is a registered trademark of DuPont® 9 used with the Salter Labs BiNAPS® transducer.
- The disposable PneumoTHERM is compatible with either ThermiSense cannulas or standard Salter Labs diagnostic cannulas.
- Both meet AASM accreditation standards.

ITEM	DESCRIPTION	SIZE	PK
5810	Reusable Adapter Cable, Kevlar	5' (1.52 m)	1
5800T	Disposable Sensor - Available Separately	Adult	10

# SLEEP DIAGNOSTIC CANNULAS

## THERMAL AIRFLOW SENSING SYSTEM

- Airflow pressure and snore monitoring
- Unique, patented, anatomically correct design
- Curved tapered nasal prongs

## NASAL ONLY
