

## ENFLOW® COMPETENCY CHECKLIST

NAME \_\_\_\_\_ DATE \_\_\_\_\_

FACILITY / HOSPITAL \_\_\_\_\_ DEPARTMENT \_\_\_\_\_

These assessment criteria are competency based. However, completion of the course in a non-clinical environment does not imply competence on the device in a clinical setting. The criteria is intended to constitute part of a continuing education program in the clinical and non-clinical environment, assisting in working towards competence but do not, in themselves, constitute competence. This document may assist in the development and self-assessment of competence or form part of an assessment by a designated hospital/trust trainer/educator. Assessment Statement for self-assessment/assessment by a designated hospital/trust trainer/educator: On completion of this assessment, I/the participant will be able to demonstrate understanding and both theoretical and clinical knowledge regarding the safety aspects and practical use of the enFlow® Warming System.

SKILLS CHECKLIST	COMPLETE	N/A
Identify and connect controller and warmer		
Connect power supply		
Connect cartridge and extension line to the IV fluid giving set		
Prime line using standard medically approved protocols ensuring cartridge is in an upward position (following direction of arrow on the cassette) while priming to eliminate any air in the line
