

Regard Blood Pressure Cuffs and AirLife Leadwires

One bedside monitoring partnership. Two essential consumable categories.

STANDARDIZED MONITORING CONSUMABLES

Pairs blood pressure cuffs and ECG leadwires into one patient monitoring accessory conversation.

INFECTION-PREVENTION ALIGNMENT

HPG blood pressure cuffs help reduce cross-contamination risk, while AirLife leadwires support both reusable and disposable ECG pathways.

OPERATIONAL SIMPLICITY

Color-coded blood pressure cuffs and broad ECG configurations support faster bedside selection.

SUPPLY CHAIN VALUE

Combined positioning can improve contract visibility, utilization, and conversion planning.

Multi-Link™ ECG leadwire configurations support all major monitoring platforms.

One blood pressure cuff partner for every patient, every size, and every care setting. Delivering accurate, comfortable solutions with broad monitor capability.

Standardize. Simplify. Support better connected care.
